

THE BREATH OF LIFE

A viewpoint from Susan Fairley

9th-11th April 2010

(with thanks to Mike Booth of Aura Soma for his numerological training)

If you take the combined numerological value of the words BREATH OF LIFE it comes down to 8. The message is clear – “As above, so below”. Further deep and empowering messages and choices flow out of the preceding four levels of each word.

We have probably all heard the phrase “The Breath is All” but have we been educated into its true power and are blocks to accessing that power now being heavily amplified as a result of the recent Pulse of Light from the Ein Soph?

Deep, deep changes are happening that need to be understood in the context of the new light flowing throughout eternity. Dedicated light workers act as receiving/transmitting pylons for this light on our planet and therefore work intuitively also with the BREATH OF LIFE. “Head in Heaven – Feet on Earth” and as near an “incarnate 8” as they can manage! Is it not possible, therefore, that they are (time-wise at present) more vulnerable to experiencing the effects of blocks to full access to the energies of the BREATH OF LIFE?

Are these blocks manifesting as increases in our personal key health issues? I think they are. Have you noticed miasms arising? Problems in respiration/reproductive area/skin? Circulation/lymphatics? Chakra problems? Soul/incarnation/earth star wobbles? I think we all know that the steady rises in light frequency release old locked-in patterns that need dealing with. This is the same, but a bit more important because this is a Light Threshold, and we have to clear it to allow the light to properly inhabit our incarnate bodies and not cause physical problems which, inter alia, reduce our ability to be effective light workers.

Listed below are some of the messages for us held in the words BREATH OF LIFE (the full translation is printed at the end of this article). These show the details of the challenges we face in order to become heirs of the gifts of the BREATH OF LIFE. Each esoteric discipline has its own methods of clearance. For those of you who are dowsers there are guideline questions supplied, not just to clear the blocks (which is simple) but to give insight into the ramifications involved. Remember that while we are all on the same path, arrival times differ, so routine checking to see if the foregoing has become a Factor is advisable for the foreseeable future.

Short translation of the numerology of BREATH OF LIFE:

Manifestation of the desire for completion/wanting to be made whole and present in this body. Being present in this body as in “the soul star within the blue globe” relative to the I AM. The hidden laws of creation seeking to be present in this body.

Put another way: “Looking at the possibilities of going beyond existing structures and to manifest the original soul essence in a new way.”

Suggested dowsing questions:

(After full prep. to work, checklist, confirmation of working 100% with LOVE, ensuring all archetypes have been cleared, any incarnational core energy defects permanently cleared and having read the above to High Self.)

High Self, what is my/my client’s percentage of engagement with the pure energies of the BREATH OF LIFE?

If less than 100%:

- a. What percentage of my/my client’s health issues are connected to blocks to the energies of the BREATH OF LIFE?
- b. Is there hesitation at proceeding further into the Light?
- c. Is it appropriate to pause at this level? If yes, for how long?
- d. Is there a block to the incarnational transformation on offer?
- e. Do I/my client feel like a traveller who can’t believe that they have arrived?
- f. Do I/my client think arrival is The End and are withdrawing?
- g. Are there any archetypes still holding energy?

These questions can provide interesting educational information. Alternatively one can proceed to Chart 1 as usual and then just ask High Self to research and clear all blocks to full connection with the BREATH OF LIFE.

Full translation:

The numerological interpretation of the words BREATH OF LIFE, read from right to left and at 5 levels:

- The five senses of the human looking at the possibility of going beyond existing structures via the incoming celestial energy, to transform itself and achieve change/new birth.
- In conscious co-operation with SPIRIT, doubly emphasised
- Being in harmony with the unfolding process in the here and now, relative to the I AM of the Being and its five senses during the process of transformation (whilst leaving the original Essence untouched)

- Manifestation of the desire for completion/wanting to be made whole and present in this body.
- Being present in this body, as in “the soul star within the blue globe” relative to the I AM.
- The hidden laws of creation seeking to be present in this body.

- Looking at the possibility of going beyond existing structures
- And manifest
- The original soul essence in a new way

As in:

- The hidden laws of creation/seventh heaven being offered to the I AM (via the BREATH OF LIFE)

To achieve:

- As above, so below (which is on offer?)
- With a suggestion that the I Ching offers counsel as to how to be in harmony with the unfolding process of things.
